Ideal for providing power to:

- Laptops
- Audio systems
- Decorative lighting
- Small kitchen appliances
- Fans
- Water fountain pumps
- Lawn and garden equipment
- Holiday lighting

Easy Installation

Figure 1

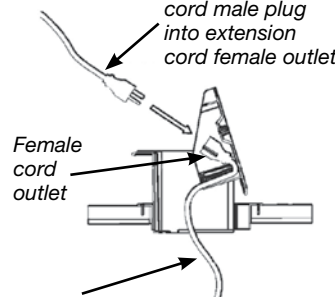

Lid pivots open to reveal face of the user's installed extension cord outlet

Retractable grommet sleeve lifts upward from deck surface

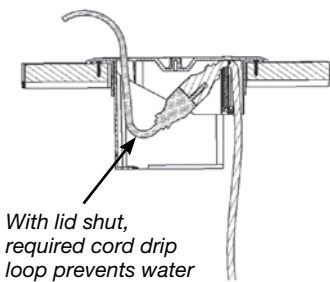

Figure 2

Insert equipment cord male plug into extension cord female outlet

Opposite end of extension cord is plugged into a GFCI outlet with while-in-use weatherproof cover (not shown)

Figure 3

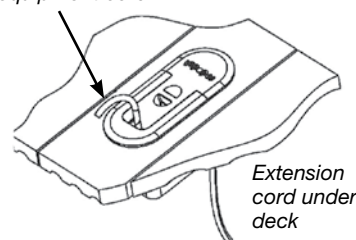

With lid shut, required cord drip loop prevents water from traveling up into plug and outlet

Figure 4

Deck grommet lid should always be closed while in use

Extension cord under deck

Deck Grommet™

Eliminates Unsightly and Unsafe Extension Cords Running Across Decks!

The Red Dot® Deck Grommet™ provides safe, economical access to line-voltage power in outdoor raised deck applications. Installed quickly and easily in wood or composite decking, it allows the homeowner to access their outdoor-rated extension cord that runs beneath the deck from an outdoor power outlet to the Deck Grommet™. Rugged, gasket-less construction safely secures the electrical connection just below the deck surface while keeping out rain, snow, ice and debris — even while in use.

- Durable, shrouded cover protects an outdoor extension cord from impact and weather-related damage in raised deck applications
- Compact design saves space and is easily concealed for decorating purposes
- Unique cover assembly allows cord to exit while maintaining NEMA 3R integrity to protect against falling rain, sleet and external ice formation when used with outdoor-rated extension cord
- Snap-in cover assembly reduces installation time and makes it easy to secure an outdoor-rated extension cord
- Black standard finish can be painted to match décor
- Supplied with mounting screws for fastening to deck and strain-relief clamp with screw for securing an outdoor-rated extension cord (extension cord not included)
- Installs easily with just a jig saw and Phillips-head screwdriver (tools not included)
- Intended for use in decks at least 12" above ground surface
- Patent Pending

Red Dot® Deck Grommet™
